

## LITTLE LILLIAN ROMAINE FISHER CAN TALK AGAIN

This attractive little lady is the two year old daughter of Mr. and Mrs. O. M. Fisher, 235 North St., Harrisburg, Pa. Last winter she had an attack of measles, together with a very severe cold. Just at that time Druggist S. J. Wilhelm presented Mr. Fisher with a jar of the Southern "outside" treatment—Vick's VapoRub Salve, which was just then being introduced in Harrisburg, and requested that he give this preparation a thorough trial. Mr. Fisher writes:—

"I must say that our baby had such a cold on her chest and in her throat that she could hardly talk, and we could not get her to take anything internally. After we used Vick's VapoRub Salve on her breast and throat at night before going to bed she was entirely relieved. No family should be without this preparation. It is externally applied, and so can be used freely—it is absorbed through and penetrates the skin, and, in addition, is inhaled as a vapor. It has a hundred uses for the many minor ailments for which every mother is the doctor. Three sizes, 25c, 50c or \$1.00.

## MOTHERHOOD WOMAN'S JOY

Suggestions to Childless Women.

Among the virtues of Lydia E. Pinkham's Vegetable Compound is the ability to correct sterility in the cases of many women. This fact is well established as evidenced by the following letter and hundreds of others we have published in these columns.

Poplar Bluff, Mo.—"I want other women to know what a blessing Lydia E. Pinkham's Vegetable Compound has been to me. We had always wanted a baby in our home but I was in poor health and not able to do my work. My mother and husband both urged me to try Lydia E. Pinkham's Vegetable Compound. I did so, my health improved and I am now the mother of a fine baby girl and do all my own housework."

Mrs. ALMA B. TIMMONS, 216 Almond St., Poplar Bluff, Mo.

In many other homes, once childless, there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong.

Write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for advice—it will be confidential and helpful.

The rate on envelopes sold through the postal system was increased 14 per cent Tuesday, effective throughout the United States. ## STAND BY PRESIDENT!

Wilson Entitled to Support of  
Both Parties, Is Plea.

Difficulties Confronting Administration  
So Great as to Call for Temporary  
Abandonment of Par-  
tisanship.

It seems to the Washington Herald that the members of congress can put their time to better use than debating informally the question as to whether the Democrats or the Republicans shall elect the speaker of the next house of representatives.

President Wilson's great successes as chief magistrate give him a claim on the support of the members of congress without regard to party, and since both Speaker Clark and Lender Mann are supporting the president's peace program, it would seem to be a case of "Holston's choice" between the two.

The president has on his shoulders greater responsibilities than have rested on any head of the government since the days of Abraham Lincoln. He is seeking to end the European war; he is seeking to keep this country out of hostilities in Europe and in Mexico; he is aiming to so manage affairs that there shall be no disturbance to the business equilibrium in the United States; he is holding in check the most pronounced pro-labor sentiment, and at the same time seeking to avoid the pitfalls dug for him by the pro-German sympathizers close to his own administration; he is facing the prospect of peace and European competition coming more quickly than a readjustment of tariff schedules can be made, and above all he is just now realizing that there is a huge deficit in the treasury which must be met either by a bond issue or by the imposition of more taxes.

President Wilson has shown a great capacity for constructive statesmanship. The burden mainly has been his, and he has carried it across many a narrow bridge, spanning many a yawning abyss. He needs the support of congress now if he is to succeed, and if the country is to avoid disaster. He needs a united party. He needs the support of the bankers of the country, who unfortunately are regarded with suspicion. He needs the support of the press, which is one great industry confronted with loss in consequence of war prices, but which is taking generally a broad and patriotic view. Congress should lead the way.

Let the country stand by the president, as he has stood by the country. The outlook is serious enough to cause the temporary interment of narrow partisanship.

### G. O. P. Has Internal Troubles.

Although the organization of the next house is a year away—unless an extra session should be called—indications are that Representative James R. Mann, the Republican floor leader for the last six years, will be eliminated as a candidate for speaker if the Republicans control the house.

There is still a smattering of Republican insurgency in the lower body. Observers of house affairs say there are about a half-dozen members of that body who must be coaxed to vote for Mr. Mann, and the chances are against landing all of them, even in the face of party necessity.

Despite the facility of Republicans for "getting together," the prospect increases that there will be a compromise candidate for the speakership.

Speaker Clark has no opposition within his own party, and is not worrying. If the Democrats organize the house, he will be the next speaker. Mr. Mann has opposition, mostly under the surface at present, but the next house will be so close the Republican candidate cannot afford to lose even one vote.

### Use for Salmon Roe.

During all the years of the salmon industry there have been millions of tons of salmon roe thrown away. American packers could find no use for the roe, and like other "waste" product it was dumped into the rivers to be carried out to sea. Now a newly arrived Russian immigrant who was familiar with the processing of sturgeon roe in his own land has proved that the salmon roe may be made most delicious. According to epicures who have tried the new product it far surpasses Russian caviar, and next year it is expected the former "waste" product will become one of the most important packs at the salmon fisheries. There are few things under the sun that the brain and the hand of man cannot put to some valuable use.

### They'll All Lose.

When the war is finally over, it is fairly certain to show all nations losers, recalling again the remark made at the beginning of hostilities that no one won the San Francisco earthquake.—Atchison Globe.

### Winter Bicycle.

A Montreal (Can.) man wanted to use his bicycle in winter. He removed the front wheel and attached a small sled to the forks. Thus he had a bicycle-sled, which enabled him to ride around at ease, says the popular Science Monthly.

### Free to Act.

What we like about the short-skirted girl is that when she stands with reluctant feet where the brook and river meet she can jump over as well as wade in.—Atchison Globe.

### CHILD LABOR LAW.

Numerous Louisville manufacturers declared that they knew of no opposition to the Kentucky child labor law among factory owners. Surprise was expressed at the statement of Commissioner of Labor Mat Cohen that intimidation had been attempted on the child labor inspector by employers who opposed the law. It is not improbable that some inspector was insolent and dogmatic in making his official visits and some busy man may used strong language.
